

## VALLI&VALLI AND AANT AT PALAZZO LITTA

April 2018

Valli&Valli collaborated with the Rome-based AANT – *Accademia delle Arti e Nuove Tecnologie* to create its *OPEN FUTURE installation* of handles. Several rooms in Palazzo Litta host Valli&Valli's iconic models, while in the penultimate room are the new designs presented at Milan Design Week 2018: *YB Duemiladiciotto* by *Yabu Pushelberg for Fusital*, and *Alina and Cenerentola*, respectively by *SOM* and *Studio Veneziano + Team*, both for Valli&Valli. The journey ends with a mystery room: an artistic interpretation, which focuses on concepts of the future, evolution and renewal. Starting with a concrete project but transcending it by playing with infinite possibilities, it shows the surprising worlds that an object as familiar as a handle can open.
